MAHMOUD EL-MOUDAD

SOC Engineer · Security Operations & SIEM

m.elmoudad@gmail.com · +352 661 776 045 · Luxembourg · Driving licence (B)

PROFILE

SOC Analyst at POST Luxembourg with over 5 years of combined experience across security operations, SIEM engineering, and security-solution integration. Currently handling L1 monitoring and triage for multiple customers on Splunk, Microsoft Sentinel, and EDR platforms (SentinelOne, Microsoft Defender), which gives me first-hand knowledge of the L1 workflow, escalation points, and the context L2 teams need for a clean handoff. Background in QRadar and Sentinel administration, detection-rule tuning aligned with MITRE ATT&CK, log source integration, and SOC process documentation. CompTIA CySA+ and IBM QRadar certified. Comfortable working directly with clients and cross-functional stakeholders. English C1, French C2, currently preparing the BTL2 certification.

PROFESSIONAL EXPERIENCE

Security Operation Analyst — SOC L1

10/2024 – Present

EDAN / POST Luxembourg

Luxembourg

- Monitor and triage security alerts for multiple customer environments using Splunk and Microsoft Sentinel (SIEM) and MS Defender / SentinelOne (EDR), applying consistent L1 escalation criteria and SLAs
- Investigate alerts using threat-intelligence sources, correlate events across firewalls, endpoints, cloud and network logs, and hand off qualified incidents to L2 with clear context and recommendations
- Work daily with the escalation and communication process between L1 and L2 — a first-hand understanding of where handoffs succeed or lose time, which I can bring directly to an L2 role
- Contribute to tuning detection rules and playbooks to reduce false positives and improve overall SOC efficiency
- Conduct incident response support and post-incident analysis, and communicate findings clearly to clients

Platform & SIEM Engineer

11/2022 – 09/2024

Sogeti

Luxembourg

- Administered and deployed IBM QRadar and Microsoft Sentinel across multiple client environments, ensuring stable platforms with correct log ingestion and effective detection content
- Designed and fine-tuned detection use cases aligned with MITRE ATT&CK, ran technical audits, and wrote SOC procedures and knowledge-base articles
- Integrated standard and non-standard log sources into SIEM platforms to extend monitoring coverage
- Managed identities and access control through Keycloak and Active Directory to support enterprise security
- Provided direct client support with fast resolution of SIEM platform issues, maintaining strong working relationships with stakeholders
- Monitored SIEM infrastructure (Red Hat Linux) and internal SOC infrastructure (VMware vCenter) to prevent interruptions and maintain stability
- Conducted vulnerability assessments and proposed remediation strategies for client environments
- Managed Microsoft Azure cloud services supporting SOC operations

Support & MSSP Consultant

03/2022 – 10/2022

Dataprotect

Casablanca

- Integrated and provided advanced support for information security solutions, including QRadar SIEM, IBM Guardium Data Protection, and Tripwire
- Managed service requests and incident resolution within strict SLAs
- Ensured continuous monitoring of client platforms to prevent service interruptions and performance drops

IT Consultant 04/2019 – 02/2022
Corporate Software / Expertise Data Casablanca

- Gathered client requirements, responded to bids, drafted technical documentation, and trained internal teams
- Implemented IBM QRadar (SIEM) log correlation and management solutions for multiple clients
- Deployed IBM Security Guardium data-traceability solutions for enterprise clients including INWI, PORTNET SA, and the Central Bank of Morocco
- Implemented sensitive-data masking solutions (Informatica Test Data Management) for PORTNET SA
- Led the migration project from SVN to Git for Maroc Telecom, and administered Office 365 for internal use

TECHNICAL SKILLS

- **SIEM & Detection Engineering** IBM QRadar, Microsoft Sentinel, Splunk — rule tuning, log source integration, use-case design aligned with MITRE ATT&CK
- **EDR & Monitoring** Microsoft Defender, SentinelOne
- **Incident Handling** L1 triage, escalation to L2, threat correlation, post-incident analysis, SOC procedures and SOPs
- **Security Integration** Guardium, Tripwire Enterprise, Keycloak, Passbolt — requirements gathering, architecture documentation, deployment
- **Scripting** Python, Bash, PowerShell
- **Infrastructure & Cloud** Active Directory, Keycloak, Microsoft Azure, VMware vCenter, Red Hat Linux

CERTIFICATIONS

- CompTIA Cybersecurity Analyst (CySA+)
- IBM Certified Associate Administrator — IBM QRadar SIEM V7.3.2
- Certified in Cybersecurity (CC) — ISC2
- ITIL® v4 Foundation — IT Service Management
- IBM Blockchain Foundation Developer · IBM Blockchain Essentials
- MTA: Windows Server Administration Fundamentals (98-365) · MTA: Database Fundamentals, SQL Server (98-364)
- In progress — BTL2 (Blue Team Level 2)

EDUCATION

- **Master's — Innovation and Digital Transformation of the Enterprise** · Université Côte d'Azur, Nice, France · 10/2018 – 09/2019
- **Engineering Degree — Computer Engineering and Networks** · Ecole Marocaine des Sciences de l'Ingénieur, Casablanca, Morocco · 10/2014 – 09/2019

LANGUAGES

- **French** C2 — full professional proficiency
- **English** C1 — full professional proficiency
